WORK EXPERIENCE

Digitomics.ai Pvt Ltd — Bengaluru, India

Machine Learning Engineer | Apr 2026 – Present

- **Multi-Agent Chat System (Orbit):** Built a multi-agent chat system with intent classification to route queries to specialized DevOps, FinOps, and general assistant agents.
- **LLM Monitoring with Langfuse:** Tracked multi-turn conversations, execution traces, latency, and token counts across individual LLM calls.
- **Cloud Cost Forecasting:** Developed and deployed ARIMA and LSTM time-series models to predict future cloud expenses and support budget optimization.
- **FinOps Tool Integrations:** Connected custom APIs with Cloud and SaaS tools to automatically pull and analyze cloud cost data.
- **Hybrid Search RAG:** Built a RAG pipeline combining Dense + Sparse (BM25/SPLADE) search with vector embeddings for internal spending data.
- **Open-Source & Cloud Model Deployment:** Served Hugging Face models in production with vLLM and GPU quantization, alongside Azure OpenAI integrations.

Sticky HR (Sulids Solutions Pvt. Ltd.) — Bengaluru, India

DevOps & Cloud Intern | Sept 2024 – Jan 2025

- **Cloud Security & Cost Optimization:** Strengthened AWS security and used predictive cloud analytics to identify and eliminate resource waste.
- **Microservices Monitoring & AIOps:** Maintained availability across 115+ microservices using Prometheus, Grafana, and Pingdom with metrics-driven anomaly alerting.

TECHNICAL SKILLS

- **Agentic AI & Integration:** Model Context Protocol (MCP), LangChain, LangGraph, Multi-Agent Architectures, API Tool/Function Calling
- **GenAI & LLMs:** Azure OpenAI, OpenAI API, Claude, Hugging Face, Open-Source LLMs, Fine-Tuning (LoRA/PEFT), Prompt Engineering
- **Deep Learning:** Neural Networks, Transformer Architectures, CNN/RNN/LSTM, Attention Mechanisms, Model Quantization, GPU Memory Optimization
- **NLP & Retrieval:** Hybrid RAG, BM25 Keyword Search, Semantic Search, Dense Embeddings, Vector Databases (pgvector, FAISS, ChromaDB)
- **Machine Learning:** Predictive Analytics, Data Preprocessing, Classification & Regression Models, Intent Classification, Scikit-learn
- **MLOps & LLMOps:** vLLM, MLflow, DVC, Kubeflow, KServe, Langfuse, Continuous Training
- **Cloud & Infrastructure:** AWS (EKS, S3, EC2), Azure (AI Foundry), GCP, Terraform (IaC)
- **Containers & Orchestration:** Docker, Kubernetes, OpenShift, Helm
- **CI/CD & DevSecOps:** GitHub Actions, Jenkins, ArgoCD, CodeBuild, SonarQube, Trivy
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack
- **Programming & Scripting:** Python, Java, C/C++, SQL, Bash

PROJECTS

MLOps Project — End-to-End ML Deployment Repo ProjectFlow

GitHub

- **Tech Stack:** Python, MLflow, DVC, Docker, Kubernetes, Kubeflow, KServe, GitHub Actions, Prometheus, Grafana, AWS. Built an end-to-end MLOps pipeline for experiment tracking, data/model versioning, automated training, model registry, CI/CD, AWS EKS deployment, and production monitoring.

AutoBrowse AI | Agentic Browser Automation & Deep Research

GitHub

- **Tech Stack:** Python, LangGraph, LangChain, MCP, Playwright, Docker. Built an LLM-powered agent for multi-step browser tasks and parallel deep research with persistent state; integrated OpenAI, Claude, Gemini, DeepSeek, and Ollama via MCP and deployed with Docker/GitHub Actions.

DevSecOps Pipeline — Tic-Tac-Toe Application

GitHub

- **Tech Stack:** React, TypeScript, GitHub Actions, SonarQube, Docker, Nexus, ArgoCD, Kubernetes. Built automated testing/security scanning, artifact management, and GitOps-based continuous delivery for a React application.

EDUCATION

BGS College of Engineering and Technology

Bachelors in Computer Science & Engineering | CGPA: 8.40

ACHIEVEMENTS

- Active Open-Source Contributor at **AOSSIE** in Resonate Tech-Stack: Flutter, Javascript, Appwrite, Livekit-Cloud; contributed **6+ PRs** improving features, packaging source code, and integrating CI pipelines with GitHub Actions.
- **Hackathon Winner & Participant (SIH):** Competed in multiple hackathons, winning and securing top positions.
